Cocaine

Methamphetamine

Cannabis

The answers

Cannabis

Methamphetamine

Cocaine

What Is Cocaine Made Of?

- Cocaine is actually cocaine hydrochloride
- Out of over 200 plant species, only 2 types of coca leaf that contain enough cocaine alkaloid for cocaine production

Source of cocaine

- Cocaine comes from the coca plant
- mostly grown in Colombia, Bolivia and Peru.
(clandestine laboratories)

- trafficked through South and Central America to Mexico to be smuggled into the United States, or shipped to markets in other parts of the world.

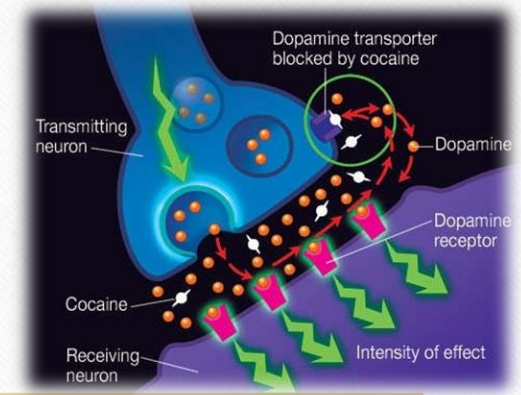

Is it legal

Illegal

Cannot buy it in a pharmacy without a doctors
prescription

Reason that people use it

- The resulting increased sensitivity produces depression and cravings if cocaine consumption ceases and dopamine levels return to normal.
- Dependency on cocaine is thus closely related to its effect on the neurons of the reward circuit.
